

PROFESSIONAL EXPERIENCE

May 2015 – Present – Chevron Nigeria Limited – Senior MRWO Engineering Advisor – Rotating 28/28

- ◆ Upfront planning & Engineering support for Hydraulic WO Rig in JV Offshore. Contract for Rig still pending.

March 2012 – May 2015 – CABGOC Malongo, Angola – Senior MRWO Engineering Advisor – Rotating 28/28

- ◆ Major Rig Workover Engineering support on five Jack-Up rigs in Block O.
- ◆ Mentored local, National engineering staff.

Dec. 2007 – Feb 2012 – Chevron Alaska – Wellbore Maintenance Team Leader

- ◆ Supervised 6 Workover/Completion Engineers.
- ◆ Team is responsible for all Alaska electric line/coil tubing, P&A, ROI rig projects and integrity compliance, assessment, mitigation and restoration.
- ◆ Responsibilities:
Wellbore Integrity, Operational Excellence, Continuous Improvement, Project planning, cost analysis, Budget planning, Project implementation, Vendor and equipment selection logistic coordination.

Feb 2002 – Dec. 2007: Unocal/Chevron Alaska – *Completions/Workover Engineer*

- ◆ Project Management of well interventions with Coil, Eline, Slickline and Drilling/Workover Rig
- ◆ Engineering, Designing and coordinating completions in the Cook Inlet.
- ◆ Established Standard Operating Procedure's (SOP's) for well intervention work in the Cook Inlet.
- ◆ Defining and accessing project scope. Historical well analysis. Engineering completion designs to meet specific optimization goals. Occasional onsite supervision of well remediation work.
- ◆ Responsibilities:
Project planning, Engineering cost analysis, Budget planning, Project implementation, Vendor and equipment selection logistic coordination, Supervising contract personnel at rig site

1996 – Feb 2002: Unocal Alaska – *Contract Completion/Workover Consultant*

- ◆ Designing and implementing High Efficiency completions in the Cook Inlet.
- ◆ Defining and accessing project scope. Historical well analysis. Engineering completion designs to meet specific optimization goals. Onsite supervision of well remediation work, Logging and Perforating.
- ◆ Supervising onsite Completion/Workover operations including contract personnel.
- ◆ Expertise in well bore construction, sand control and production/completion optimization design.
- ◆ Two patent pending Completion designs with Unocal.
- ◆ One patent pending Frac-Pack design with BJ Services.
- ◆ Responsibilities:
Project planning, Engineering cost analysis, Budget planning, Project implementation, Vendor and equipment selection, Supervising contract personnel at rig site

1995 – 1997: Marlin Pacific Alaska – Part Owner of a Hydraulic Workover Rig business, located in Kenai.

- ◆ Managed engineering, sales, administration and operations.
- ◆ Responsibilities:
Marketing, Finances, Goal setting, Budgets, Planning, QA/QC, HS&E and Training

1995: Unocal Alaska – Contract Drilling Forman

- ◆ Supervisor and coordinator for all service companies on well site
- ◆ Responsibilities:
H S & E for all personnel and equipment on well site. Project budget and expense. Logistics coordinating.

1978 – 1995: Baker Sand Control and Baker Hughes INTEQ – Alaska Area Manager, California Regional Sales, Operational Supervisor and Technical Specialist.

TECHNICAL AND ANALYTICAL SKILLS

- ◆ Good working knowledge of well work, drilling, and production operations
- ◆ Strategic planning skills
- ◆ Extremely proficient with various software programs
